The next era of cannabinoid medicine.

From fragmented healthcare to connected infrastructure and precision clinical intelligence.

BEFORE

Fragmented care.

Disconnected patients, clinicians, pharmacies and manufacturers.

pH7

Connected infrastructure.

One digital marketplace coordinating access, clinical workflows and fulfilment.

CCIE™

Precision clinical intelligence.

Evidence-informed, patient-specific treatment guidance with clinician oversight.

Illustrative interface

The infrastructure creates distribution. The intelligence creates a compounding advantage.

Patients Increased access → **Clinical Activity** Consultations & prescriptions → **Revenue** Multiple streams → **Governed Evidence** Real-world outcomes → **Better Intelligence** Improved guidance → **Greater Adoption** Global expansion

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

An industry without the infrastructure to deliver precision care.

Patients struggle to access treatment. Doctors navigate fragmented evidence. Pharmacies and manufacturers operate through disconnected systems.

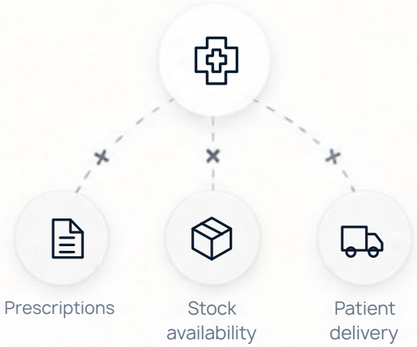

01
PATIENTS
Fragmented access.
Finding clinicians, prescriptions and available medication requires navigating disconnected services.

02
CLINICIANS
Fragmented evidence.
Complex dosing decisions rely on dispersed research, product information and individual clinical experience.

03
PHARMACIES
Disconnected fulfilment.
Prescription management, stock availability and patient coordination remain operationally fragmented.

04
MANUFACTURERS
Limited intelligence.
Fragmented distribution and clinical feedback restrict visibility into demand and product utilisation.

THE CLINICAL CONFIDENCE GAP

88%

of surveyed physicians were unsure of an effective THC dose.

89%

were unsure of an effective CBD dose.

Published survey of 244 healthcare providers.

The industry needs more than access. It needs connected infrastructure and clinical intelligence.

Source: Kruger et al., 2022. Survey conducted in 2020 among 244 physicians in one US health system.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

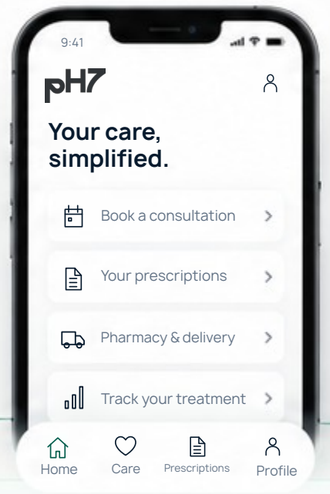

One platform. The entire healthcare ecosystem.

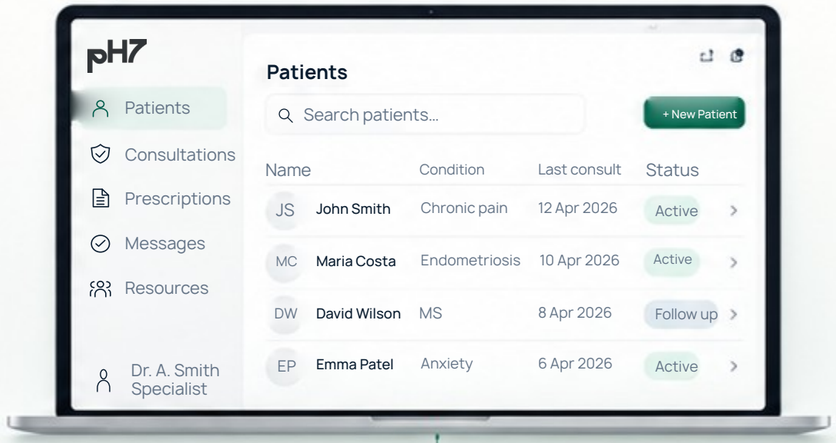

Connecting the industry's participants through one digital infrastructure, with CCIE providing specialised clinical intelligence.

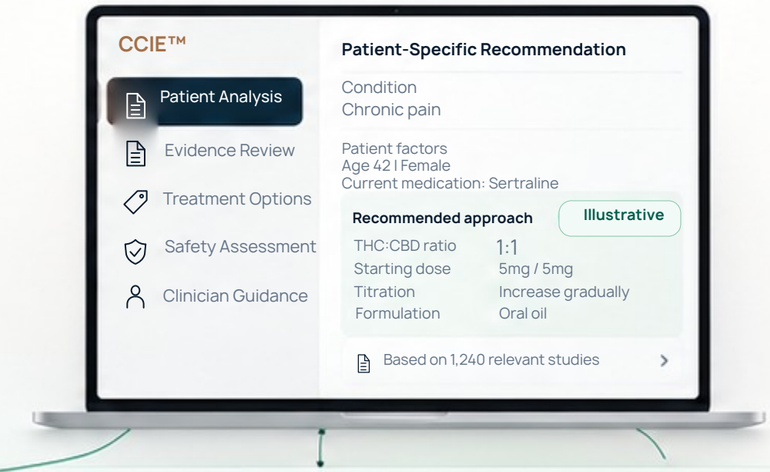

PATIENT ACCESS
Consultations, prescriptions and pharmacy coordination.

CLINICAL DELIVERY
Independent clinicians, integrated records and prescribing workflows.

CLINICAL INTELLIGENCE
Evidence-informed, patient-specific decision support.

Patients Access care

Clinicians Deliver treatment

ONE CONNECTED INFRASTRUCTURE
Patients · Clinicians · Pharmacies · Manufacturers · Regulators

Pharmacies Dispense & fulfil

Manufacturers Supply products

Regulators Compliance & governance

CCIE™ THE INTELLIGENCE LAYER
Evidence · Patient modelling · Safety · Clinical guidance

Clinical Activity Consultations & prescriptions → **Structured Data** Clinical records & outcomes → **CCIE Evaluation** Evidence-informed analysis → **Improved Intelligence** Better clinical guidance → **Greater Platform Value** Expansion & adoption

Illustrative interfaces with synthetic data. Clinician review required. No patient or clinical outcome is represented.

3.63 million research records.
One clinically justified decision.

Setting the foundation for a new standard of excellence in cannabinoid medicine.

3.63M
research-source records
Peer-reviewed studies, clinical trials and real-world evidence.

355,793
indexed publications
Systematically analysed and continuously updated.

1,000+
cannabinoid products
Regulated medicines, formulations and real-time product data.

CCIE™

Evidence harmonisation

MILLIONS OF DATA POINTS.
ONE EVIDENCE-DRIVEN OUTPUT.

PATIENT-SPECIFIC THERAPEUTIC ASSESSMENT — Illustrative output

Patient profile
Female | 42 years

Primary indication
Chronic neuropathic pain

Medical history
Fibromyalgia, sleep disturbance

Current medication
Gabapentin

Treatment objective
Pain management with daytime functionality

RECOMMENDED FORMULATION — Illustrative

CBD-dominant oral formulation
CBD:THC 20:1
Oral oil

Starting dose	5mg CBD once daily (PM)
Titration	Increase by 5mg every 3–7 days as tolerated
Safety	No significant interactions identified
Evidence	12 key studies • View references
Product options	3 regulated products available

Clinician review required — Final decision at the discretion of the prescribing clinician.

Company-reported technical benchmarks, not clinical validation. Source: CCIE Executive Summary, 25 Oct 2026, pp. 4–5, 9.

97.1% — **Agreement with published doses**
In held-out published-study comparison

84/84 — **Safety-stop tests passed**
Across designated safety challenges.

80+ — **International patents**
Dr Stephen D. Barnhill, MD
Biomedical AI pioneer with nearly 40 years of experience.

Licensable clinical intelligence infrastructure
From €500 per clinic / month.

From scientific complexity to clinical clarity. The future standard of cannabinoid medicine.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

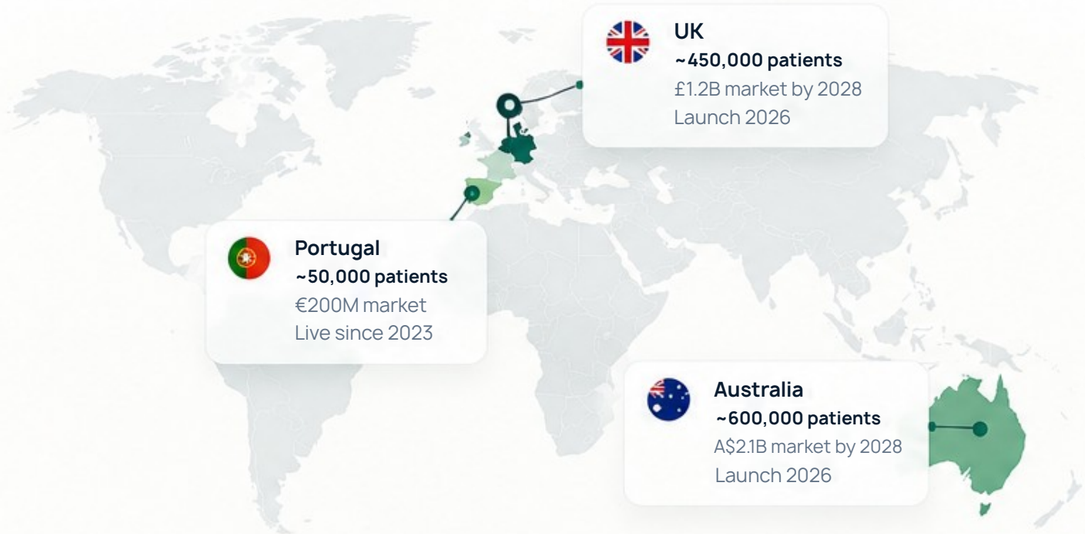

A global market. Real demand. Multiple expansion opportunities.

Medical cannabis is a fast-growing, regulated global industry.
pH7 is positioned to capture significant value across multiple markets.

€50B+
Global market by 2030
CAGR ~20% (2025-2030).

3M+
Patients today
Expanding access and growing clinical adoption.

€8–12B
Near-term addressable revenue for pH7
UK, AU and PT combined opportunity (illustrative).

PROVEN LAUNCH MODEL

Portugal	Live since 2023	1-hour Lisbon Next-day nationwide
United Kingdom	Launch 2026	East Midlands pilot National rollout
Australia	Launch 2026	Queensland first National expansion

FURTHER EXPANSION

European opportunity
Regulated markets across Europe with significant patient demand.

Additional markets
North America, LATAM and selected Asia-Pacific markets.

600k+
Patients in Australia
One of the world's largest regulated markets.

20%+
Expected CAGR
Global market growth to 2030

1,000+
Product SKUs
Expanding range of regulated medicines.

Favourable regulation
Growing acceptance across major markets with established regulatory pathways.

A large, growing and increasingly regulated global market. pH7 is built to scale.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

One infrastructure. Multiple revenue engines.

A scalable business model that monetises the movement of patients, prescriptions and products, while licensing clinical intelligence to the wider healthcare industry.

TRANSACTION REVENUE

Revenue from clinical and pharmacy activity.

20%

Consultation commission

Of eligible consultation fees.

20%

Pharmacy transaction commission

Of eligible medication revenue.

pH7

THE CONNECTED HEALTHCARE INFRASTRUCTURE

RECURRING & INTELLIGENCE REVENUE

Revenue from enterprise access, clinical intelligence and data.

€5K – €10K

Manufacturer subscriptions

Per manufacturer, per month.

€500

CCIE™ licensing

Per clinic, per month.

∞

Research & data products

Governed research collaborations and aggregated insights.

01 **Activity drives revenue**
Patient consultations and pharmacy transactions. →

02 **Scale increases value**
More patients, partners and products strengthen the ecosystem. →

03 **Intelligence creates new markets**
CCIE licensing and data products open additional revenue opportunities.

From patient activity to global impact. A scalable, multi-revenue platform.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

They built clinics.
We built the infrastructure connecting the industry.

From clinic-centric healthcare delivery to an independent-provider platform combining infrastructure, commercial networks and clinical intelligence.

TRADITIONAL OPERATORS

Clinic-centric model

Vertically integrated. Patients tied to one provider.

Patients
Acquire patients

→

Clinic
Deliver consultations

→

Treatment
Prescribe medication

→

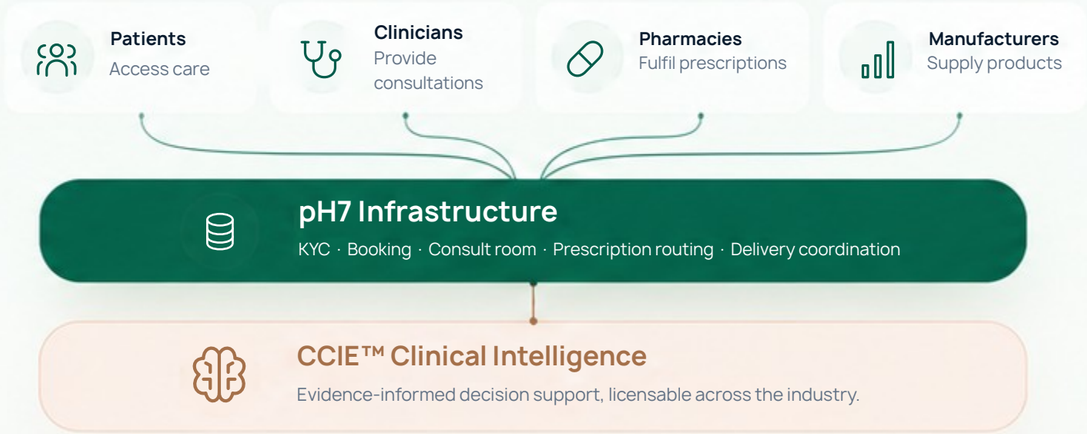

Pharmacy
Dispense products

UK market examples:
Alternaleaf • Curaleaf Clinic • Mamedica • Releaf

→

Infrastructure + intelligence model

An independent-provider platform connecting the entire industry.

01 Asset-light infrastructure
Scale without owning clinics, pharmacies or cultivation facilities.

02 Multi-sided network
One platform serving patients, clinicians, pharmacies and manufacturers.

03 CCIE™ intelligence
Specialised, evidence-informed clinical software with independent licensing potential.

04 International architecture
Designed for regulated markets across multiple jurisdictions.

We don't need to own the industry. We aim to become the infrastructure it runs on.

The infrastructure is built. Now we scale.

Validated acquisition economics, established international relationships and a scalable revenue model.

€2.50
Cost per install
Demonstrated on Google campaigns (Portugal).

5×
Reported campaign ROI
Portocanna campaign (Apr 2025).

€300K+
Annual revenue potential
Existing commercial relationships and pipeline.

100+
Active patients
Early commercial validation across our markets.

DIGITAL ACQUISITION ADVANTAGE

€15K/month
Reported Google advertising capacity
Approved app acquisition campaigns for pH7.

120K+
Monthly MedBud visits
Established distribution channel for UK launch.

pH7 promotes access to healthcare services rather than prescription medicines, enabling compliant digital acquisition through approved channels.

FROM INVESTMENT TO SCALE

Growth capital → Patient acquisition → Clinical activity → Revenue → Scale

INTERNATIONAL READINESS

PORTUGAL
Operating
Established network and commercial activity.

UNITED KINGDOM
Launch infrastructure
Clinical network, pharmacy relationships and distribution channels.

AUSTRALIA
Early activation
Clinical onboarding, pharmacy partnerships and agreements.

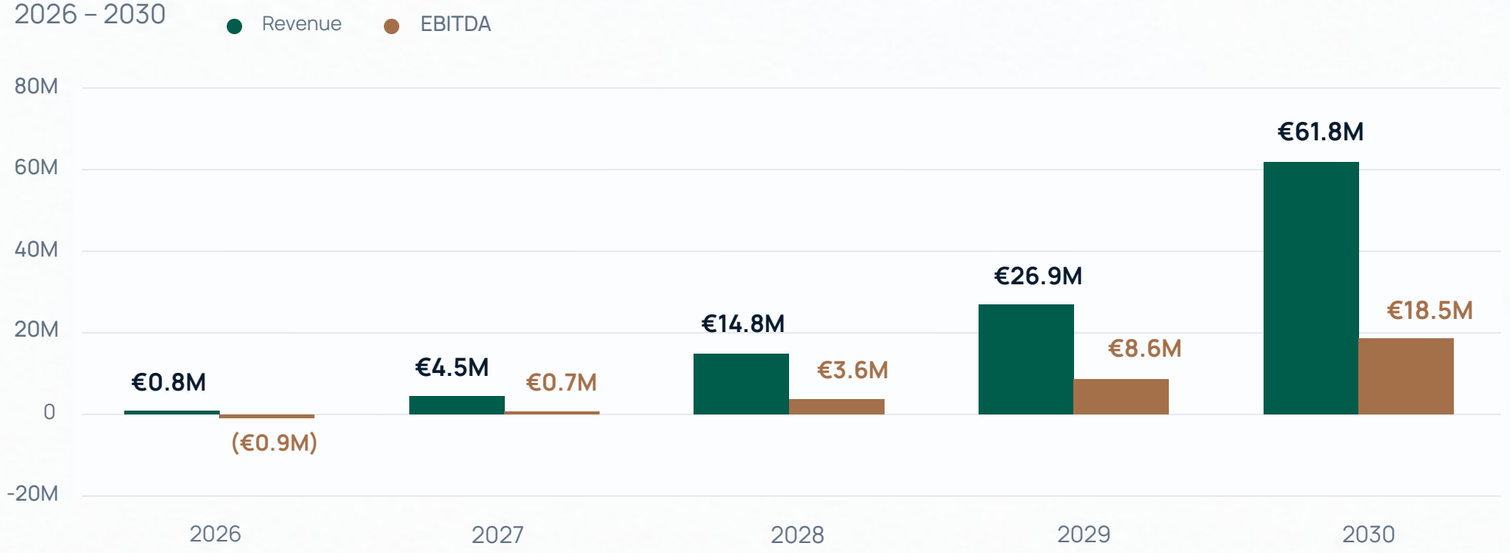

The technology is established. The distribution is identified. Investment accelerates growth.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

Built for scale.
Designed for operating leverage.

International expansion, transaction growth and recurring clinical intelligence revenue create significant long-term potential.

PROJECTED REVENUE & EBITDA
2026 – 2030

ANNUALISED EXIT REVENUE SCENARIOS

BEAR CASE
€7.14M
Slower market adoption and enterprise uptake.

BASE CASE
€26.35M
Execution of the current commercial plan.

BULL CASE
€61.76M
Accelerated international growth, enterprise adoption, and CCIE licensing.

Annualised exit revenue scenarios. Source: management model.

2030 KEY METRICS

€18.5M
Projected EBITDA

30%
Projected EBITDA margin

Source: management model. Figures shown for 2030 (upside scenario).

KEY MODEL ASSUMPTIONS

01 **Patient acquisition**
€2.50 historical CPI (paying-patient CAC modelled separately).

02 **Transaction revenue**
20% of eligible consultation and pharmacy revenue.

03 **Enterprise subscriptions**
€5K – €10K per manufacturer, per month.

04 **CCIE™ licensing**
€500 per clinic, per month.

One infrastructure. Multiple markets. Significant operating leverage.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

The expertise to build it.
The experience to scale it.

Six leaders combining international technology, biomedical AI, regulated healthcare and cannabis commercialisation.

OK

Oska Keene
Founder & CEO

3
international markets

Founder of pH7, leading the development of a digital healthcare infrastructure platform across Portugal, the UK and Australia.

RS

Ron Smith
Chief Technology Officer

18+
years in technology

Former fintech CTO with experience scaling digital platforms and leading engineering organisations of up to 150 people.

SM

Stuart Marsh
Australia Lead

25 years
in commercial innovation

Former Chief Commercial Officer at Cannim, with extensive experience developing and commercialising brands across international regulated markets.

CE

Chris Elliott
Clinical Liaison

UK & Australian clinical operations

Experienced healthcare operator involved in launching and managing medical cannabis clinics across regulated markets.

JM

Josh Munk
Commercial & Partnerships

Nearly 30 years
in cannabis

Cannabis industry veteran with experience spanning cultivation, extraction, manufacturing, retail and regulatory advocacy in the United States and international markets.

SB

Dr Stephen D. Barnhill, MD
Clinical Intelligence Advisor

80+
international patents

Physician and biomedical AI pioneer with nearly four decades of experience in medical technology and the development of CCIE.

SIX PEOPLE.
FIVE CRITICAL DISCIPLINES.

Technology
Scalable, secure healthcare infrastructure.

Biomedical AI
Clinical intelligence and evidence-based care.

Clinical Operations
Healthcare delivery and patient outcomes.

Regulatory Markets
Multi-jurisdictional compliance and access.

Commercialisation
Global partnerships and market expansion.

The right expertise, assembled to establish a new standard in cannabinoid medicine.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING

The infrastructure is built.
The opportunity is now.

Growth capital to accelerate international expansion and establish pH7 and CCIE as leading infrastructure and intelligence platforms for cannabinoid medicine.

€400,000
Convertible bridge financing
Capital to accelerate commercial execution and international expansion.

20%
Proposed conversion discount
At the next qualifying financing (subject to final documentation).

€2M
Targeted institutional financing
Planned for Q1 2027 to support international scale.

WHY NOW

01 REGULATION IS ESTABLISHED
Medical cannabis prescribing pathways now exist across key international markets.

02 THE INFRASTRUCTURE EXISTS
Technology, clinical relationships, pharmacy networks and commercial architecture are in place.

03 THE INTELLIGENCE ADVANTAGE
CCIE creates the potential for a new clinical standard for cannabinoid prescribing.

USE OF FUNDS | €400,000

40%	25%	20%	10%	5%
€160,000	€100,000	€80,000	€40,000	€20,000
UK launch and regulatory finalisation.	Australia launch and partner activation.	Product and clinical team expansion.	Marketing and patient acquisition.	Working capital and contingencies.

NEXT 12 MONTHS

Q4 2026 — Bridge financing
Close €400,000 bridge and accelerate commercial activation.

Q1 2027 — Institutional financing
Target €2M raise alongside UK expansion and Australian market activation.

Q2 – Q3 2027 — Commercial scale
Expand patient acquisition, enterprise partnerships and CCIE licensing.

The future of cannabinoid medicine is being built.
This is the moment to scale it.

INTERNAL REVIEW · EVIDENCE RECONCILIATION PENDING
